AUREON DATABASE TABLE DESIGN

Scrum Master

Rony Tom
Assistant Professor
Department of Computer Applications

AUREON Database Table Design

Role Table

Purpose:

Stores the different user roles (Business Architect, Project Manager, Team Lead, Developer, Tester) used for role-based access control.

tbl_role

Field	Data Type	Key	Description
role_id (PK)	INT	Primary Key (PK)	Description of role_id (PK).
role_name	VARCHAR(50)	-	Description of role_name.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

User Table

Purpose:

Stores user registration and login information along with profile details, role, and team assignment.

tbl_user

Field	Data Type	Key	Description
user_id (PK)	INT	Primary Key (PK)	Description of user_id (PK).
user_name	VARCHAR(100)	-	Description of user_name.
user_email	VARCHAR(100)	-	Description of user_email.
user_password	VARCHAR(255)	-	Description of user_password.
user_phone	VARCHAR(15)	-	Description of user_phone.
user_employee_id	VARCHAR(30)	-	Description of user_employee_id.
role_id (FK)	INT	Foreign Key (FK)	Description of role_id (FK).
team_id (FK)	INT	Foreign Key (FK)	Description of team_id (FK).
user_status	ENUM	-	Description of user_status.
user_created_at	DATETIME	-	Description of user_created_at.
is_active	BOOLEAN	-	Indicates whether the

			record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Project Table

Purpose:

Stores software project information including project details, repository, project manager, and business architect.

tbl_project

Field	Data Type	Key	Description
project_id (PK)	INT	Primary Key (PK)	Description of project_id (PK).
project_name	VARCHAR(100)	-	Description of project_name.
project_description	TEXT	-	Description of project_description.
project_start_date	DATE	-	Description of project_start_date.
project_end_date	DATE	-	Description of project_end_date.
project_repository_url	VARCHAR(255)	-	Description of project_repository_url.
project_status	VARCHAR(30)	-	Description of project_status.
business_architect_id (FK)	INT	Foreign Key (FK)	Description of business_architect_id (FK).
project_manager_id (FK)	INT	Foreign Key (FK)	Description of project_manager_id (FK).
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Team Table

Purpose:

Stores team details and associates each team with a project and team lead

tbl_team

Field	Data Type	Key	Description
team_id (PK)	INT	Primary Key (PK)	Description of team_id (PK).
project_id (FK)	INT	Foreign	Description of

		Key (FK)	project_id (FK).
team_name	VARCHAR(100)	-	Description of team_name.
team_type	VARCHAR(50)	-	Description of team_type.
team_lead_id (FK)	INT	Foreign Key (FK)	Description of team_lead_id (FK).
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Sprint Table

Purpose:

Stores sprint information such as sprint goals, schedule, priority, and sprint status.

tbl_sprint

Field	Data Type	Key	Description
sprint_id (PK)	INT	Primary Key (PK)	Description of sprint_id (PK).
project_id (FK)	INT	Foreign Key (FK)	Description of project_id (FK).
sprint_name	VARCHAR(50)	-	Description of sprint_name.
sprint_goal	TEXT	-	Description of sprint_goal.
sprint_start	DATE	-	Description of sprint_start.
sprint_end	DATE	-	Description of sprint_end.
sprint_priority	ENUM	-	Description of sprint_priority.
sprint_status	VARCHAR(30)	-	Description of sprint_status.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Task Table

Purpose:

Stores all tasks assigned to developers, including deadlines, progress, and task status.

tbl_task

Field	Data Type	Key	Description
task_id (PK)	INT	Primary Key (PK)	Description of task_id (PK).
sprint_id (FK)	INT	Foreign Key (FK)	Description of sprint_id (FK).
assigned_by	INT	-	Description of assigned_by.
assigned_to	INT	-	Description of assigned_to.
team_id	INT	-	Description of team_id.
task_title	VARCHAR(150)	-	Description of task_title.
task_description	TEXT	-	Description of task_description.
task_priority	ENUM	-	Description of task_priority.
task_deadline	DATE	-	Description of task_deadline.
task_progress	INT	-	Description of task_progress.
task_status	VARCHAR(30)	-	Description of task_status.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Repository Table**Purpose:**

Stores Git repository information for each software project used for code analysis.

tbl_repository

Field	Data Type	Key	Description
repository_id (PK)	INT	Primary Key (PK)	Description of repository_id (PK).
project_id (FK)	INT	Foreign Key (FK)	Description of project_id (FK).
repository_name	VARCHAR(100)	-	Description of repository_name.
repository_url	VARCHAR(255)	-	Description of repository_url.
repository_branch	VARCHAR(100)	-	Description of

			repository_branch.
repository_clone_status	VARCHAR(30)	-	Description of repository_clone_status.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Code Analysis Table

Purpose:

Stores the results of static code analysis such as maintainability, complexity, technical debt, documentation quality, and overall code quality score.

tbl_code_analysis

Field	Data Type	Key	Description
analysis_id (PK)	INT	Primary Key (PK)	Description of analysis_id (PK).
repository_id (FK)	INT	Foreign Key (FK)	Description of repository_id (FK).
analysis_date	DATETIME	-	Description of analysis_date.
analysis_maintainability	FLOAT	-	Description of analysis_maintainability.
analysis_complexity	FLOAT	-	Description of analysis_complexity.
analysis_duplication	FLOAT	-	Description of analysis_duplication.
analysis_technical_debt	FLOAT	-	Description of analysis_technical_debt.
analysis_documentation	FLOAT	-	Description of analysis_documentation.
analysis_overall_score	FLOAT	-	Description of analysis_overall_score.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Dashboard Table

Purpose:

Stores project dashboard metrics including health score, sprint completion, task completion, and repository status.

tbl_dashboard

Field	Data Type	Key	Description
dashboard_id (PK)	INT	Primary Key (PK)	Description of dashboard_id (PK).
project_id (FK)	INT	Foreign Key (FK)	Description of project_id (FK).
dashboard_health_score	FLOAT	-	Description of dashboard_health_score.
dashboard_sprint_completion	FLOAT	-	Description of dashboard_sprint_completion.
dashboard_task_completion	FLOAT	-	Description of dashboard_task_completion.
dashboard_repository_status	VARCHAR(30)	-	Description of dashboard_repository_status.
dashboard_updated_at	DATETIME	-	Description of dashboard_updated_at.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Report Table

Purpose:

Stores notifications sent to users regarding task assignments, project updates, reminders, and alerts.

tbl_report

Field	Data Type	Key	Description
report_id (PK)	INT	Primary Key (PK)	Description of report_id (PK).
project_id (FK)	INT	Foreign Key (FK)	Description of project_id (FK).
report_type	VARCHAR(50)	-	Description of report_type.
report_generated_by	INT	-	Description of report_generated_by.
report_generated_date	DATETIME	-	Description of report_generated_date.
report_file_path	VARCHAR(255)	-	Description of report_file_path.
is_active	BOOLEAN	-	Indicates whether the

			record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).

Notification Table

Purpose: Stores notifications sent to users regarding task assignments, project updates, reminders, and alerts.

tbl_notification

Field	Data Type	Key	Description
notification_id (PK)	INT	Primary Key (PK)	Description of notification_id (PK).
user_id (FK)	INT	Foreign Key (FK)	Description of user_id (FK).
notification_title	VARCHAR(150)	-	Description of notification_title.
notification_message	TEXT	-	Description of notification_message.
notification_status	ENUM	-	Description of notification_status.
notification_created_at	DATETIME	-	Description of notification_created_at.
is_active	BOOLEAN	-	Indicates whether the record is active (1 = Active, 0 = Inactive).
is_deleted	BOOLEAN	-	Indicates whether the record has been soft deleted (0 = Not Deleted, 1 = Deleted).
